

Solstice Advanced Materials Inc.
May 22, 2026 Shareholder Meeting Q&A

Q. Why can't I reinvest my dividends?

- A.** While Honeywell International Inc. offered a company-sponsored Dividend Reinvestment and Stock Purchase Plan ("DRIP") for your Honeywell shares and associated dividends, Solstice Advanced Materials Inc. does not currently maintain a company-sponsored DRIP program.

Many brokerage firms provide their customers with the ability to automatically reinvest dividends through what is commonly referred to as a "Broker DRIP." We encourage you to contact your broker directly to determine whether this option is available to you and to learn more about how it may be implemented for your account.

Q. Can you provide an update on the timing of your exploration of new Nuclear conversion capacity?

- A.** Nuclear is an area we are really excited about, given the accelerating industry growth trajectory. We have previously announced that we hired an EPC firm to do initial feasibility work for us as we contemplate further investment. No update to provide today, but we hope to be in a position to provide an update later this year. We will be hosting an informational webinar on our Nuclear business on Thursday June 4th at 10am Eastern.
